

# Ideally suited for children, the very best for you: good reasons for choosing KEMMLIT

Our sanitary fittings for children have two main purposes: To make children enjoy and feel comfortable using the facilities. On the other hand, you as the operator should receive a custom made solution at an attractive cost-value ratio.

To ensure this our sales representative will be there to assist you in choosing a design for the interior of your facilities which is suitable for children.

In this brochure we introduce the major advantages of our products. If you wish to know more, just give us a call – our sales representative will be glad to assist you.

## 1 Maximum safety for your children

*Well thought-out details  
for all critical areas  
to prevent any danger  
of injury.*

---

## 2 Colours and shapes suitable for children

*Based on our wide range  
of colours and ergonomic  
solutions, facilities emerge  
which will make you feel  
comfortable.*

---

## 3 High quality solutions for the entire facility

*Complementary products  
guarantee a harmonising  
overall visual impact and  
durability of the products.*

---

## 4 Competent and extensive consulting service

*Our own sales representatives  
and professional installation  
crews ensure a quick reaction  
time from the initial discussion  
up to the installation.*

# Cubicle systems – with safety in mind

So our little ones can conquer the washroom by themselves as well: KEMMLIT cubicle systems are not only **GUV** and **TÜV** approved, but offer even more safety with unique solutions.

## Quality to meet the highest demands:

Type D-Bambino, made of 30 mm thick high density melamine resin-coated particle board with colourful ABS lipping, is nearly indestructible.

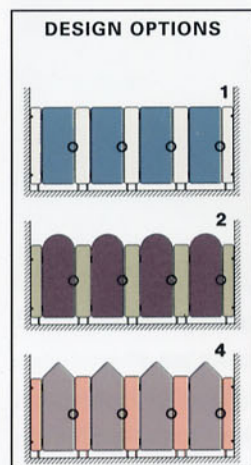

Type B-Bambino, made of 13mm thick solid grade laminate HPL panels, can also be used in wet areas.

## KEMMLIT safety nylon ring handles:

Special edgeless handles with integrated door stop buffer to prevent injury.

## KEMMLIT safety doors:

Self-closing, outwards opening doors with special soft lipping. Optionally, doors can be supplied with a latch lock suitable for children.

## KEMMLIT safety hinges:

Maximum safety to prevent children from injuring their hands is provided by the special continuous rounded aluminium safety profile, thus eliminating the possibility of a gap between panel and door and the danger of trapping hands.

## KEMMLIT safety edges:

Rounded edges and corners on every door, panel, mounting and connecting part.

## Children need colours:

All of KEMMLIT's nursery school products are characterised by the continuous, harmonising colour concept.

6 colours are available for door handles, fittings and accessories, for panels there are even 16 colours, which can be freely combined. Strong colours are not just pleasant to look at, but also help children orientate themselves.

# Vanitory units – perfection in detail

Vanitory units by KEMMLIT set the benchmark: with exemplary ergonomics, a wide range of colours and shapes, easy to clean and robust.

Vanitory units that grow with the children: variable heights of the vanitory units will enable all children, no matter what their size, to comfortably use the facility. Due to the vanitory units jutting out into the room several children can use the facility simultaneously.

## Safety in detail:

countersunk mirrors in the HPL panel have not only a great visual impact, but also greatly increase the safety.

## Easy to clean, robust, hygienic:

attributes which apply to all KEMMLIT products, especially the seamlessly countersunk wash basins made of MARLAN.

## Individual shapes in compliance with your room layout:

we manufacture custom made solutions. Colours and shapes form a harmonising unit suitable for children.

# Baby changing tables and a wide range of shelves – simply ingenious

**KEMMLIT leaves nothing to be desired:** after years of experience we know the special requirements – therefore all details add up.

Baby changing tables that are well thought-out: made of water-resistant HPL, with plenty of space in the drawers and optional cupboards with shelves. Guard panels around the edges prevent danger of falls. Convenient seamlessly countersunk baby bath tub, made of robust MARLAN material, never feels cold to the touch and in which you can even shower the baby – would you like more? As an option, the drawers can even be locked with a turn knob in the rear guard panel.

**Solutions for areas with little space:** free-standing toothbrush tumbler rack with towel hooks are not just tidy but at the same time serve as a partition to divide a room into separate areas.

**Convenience in every detail:** smooth, easy to clean, custom made toothbrush tumbler racks with matching stickers, tumbler and towel hooks in various designs.

**Shelves with integrated protection:** due to a special mechanism, the KEMMLIT safety shelf can be installed with an incline, to make sure that items inadvertently toppling over will roll to the rear of the shelf, preventing them from ever falling down and injuring children – simply inspired.

**Individual  
sanitary fittings  
by KEMMLIT**

**For example:**

Changing cubicles  
Toilet cubicles  
Shower cubicles  
Locker systems  
Vanitory units  
Shelving  
Bench seating  
Baby changing stations  
Doors and frames
