SOFT
CLASSIC ALU

SOFT CLASSIC ALU

Design

The SOFT CLASSIC ALU range is particularly fit for the market of light standing products, such as pharmaceuticals, parapharmacy, perfumery, cosmetics, or gifts. Definitely present when surface-mounted or nearly invisible behind panels, the slot channels with a compact 37-mm pitch allow great modularity of the accessories. This system with its original SOFADI look (patented model) gives the designer a total freedom to conceive any merchandising project. The use of glass shelf retainers improves safety and unobtrusiveness, allowing shelf overhang.

Material/Finish

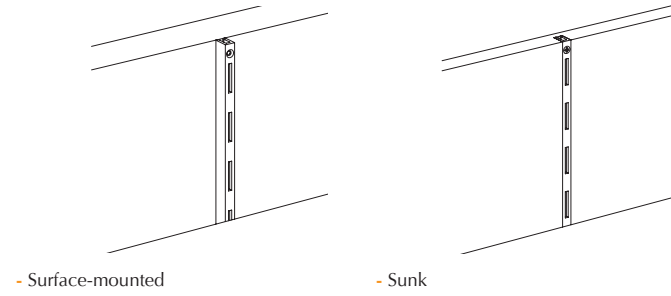

The slot channels are made of an aluminium alloy allowing (silver or golden) anodized and powdercoated finish.

	Material	Finish
	Aluminium	AS: Satin silver anodized O4S: Satin gold no. 4 anodized ANNO: Satin black anodized
	Aluminium	AS: Satin silver anodized O4S: Satin gold no. 4 anodized ANNO: Satin black anodized
