SLOT CHANNEL  
SQUARE  
DESIGN ALU

# SQUARE DESIGN ALU

## Design

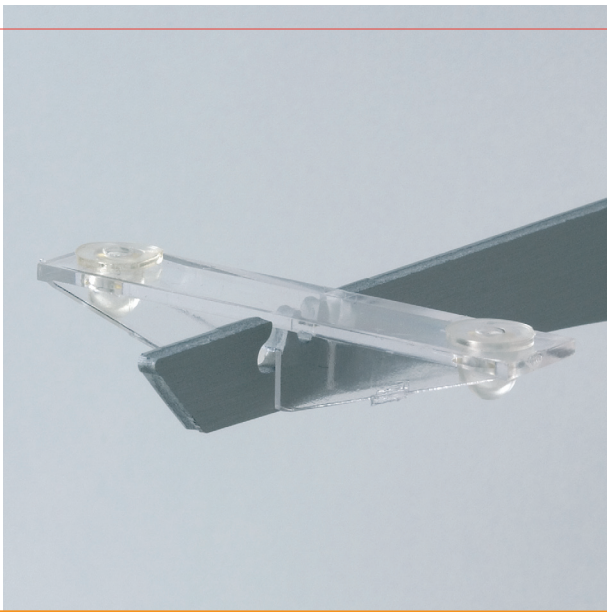

The SQUARE DESIGN ALU range is particularly fit for the market of light standing products, such as pharmaceuticals, parapharmacy, perfumery, or cosmetics. SQUARE DESIGN ALU offers the professionals a great variety of modular applications with horizontal or inclined glass shelves.

All types of fitting and merchandising are possible, thanks to a wide choice of slot channels with a compact 37-mm pitch. The curved line of the brackets gives the shelving an aerial look and optimizes the shelf space by saving useful height between the shelves. The use of glass shelf retainers improves safety and unobtrusiveness, allowing shelf overhang.

## Material/Finish

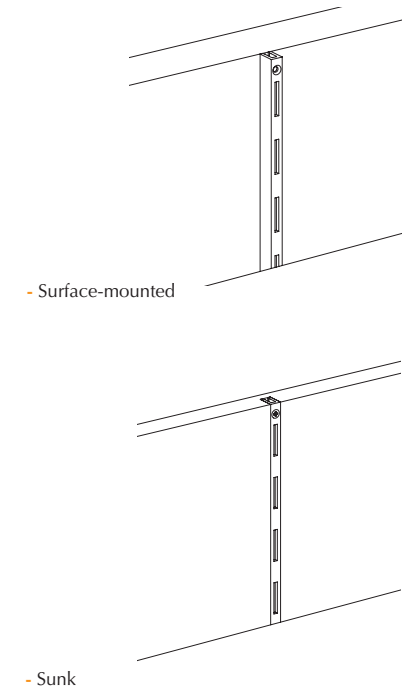

Slot channels and brackets are made of an aluminium alloy allowing (silver or golden) anodized and powdercoated finish. Clear plastic saddles enhance the transparency effect of the glass shelf.

	Material	Finish
	Aluminium	AS: Satin silver anodized O4S: Satin gold no. 4 anodized ANNO: Satin black anodized
	Aluminium	AS: Satin silver anodized O4S: Satin gold no. 4 anodized ANNO: Satin black anodized
